

S-MOVING LAB

OBJETIVOS DE DESARROLLO SOSTENIBLE

Málaga ODS

9th October 2019

08:30 Registration and welcome coffee

Sponsor by:

10:00 **What does the Connected Mobility Hub offer to investors?**

We will explain how the Connected Mobility Hub connects their 125 associated Startups with its community of 200 investors specialized in mobility

» **Tom Horsey.** Co-founder & Investor Relations de Connected Mobility Hub, **Connected Mobility Hub**

10:20 **Start up Pitches Connected Mobility Hub**

Gamification and data for the mobility of the future

Ciclogreen provides an easy-to-use online reward system (web+ app) to promote and analyse sustainable mobility practices in companies, universities and city councils, helping them to achieve the objectives of their sustainable mobility plans, reduce CO2 emissions/air pollution and have healthier and more productive employees, students and citizens

» **Gregorio Magno.** CEO, **Ciclogreen**

CSR and sustainable mobility for your company at low cost thanks to carpooling

» **Ignacio Zaballos.** CEO, **Journify**

Sea Ports 4.0: The impact of technology on the port-logistics environment

» **Andrés Garrido.** CEO, **ChainGoTech**

How do I trace the data that add value to my mobility model?

GantaBI will showcase how to use Artificial Intelligence to sort, trace and manage the data within the exponential growth of digitalized mobility

» **Javier Cañestro.** CEO, **Gantabi**

Pangea Aerospace's Reusable MESO Rocket

The rise of the small satellite market and how the launcher sector is shifting towards the provision of tailored services to those satellites. In particular, Pangea Aerospace's micro-launcher (named MESO) aims at providing those services with increasing efficiency through the use of two main technologies: an aerospike engine and a novel recovery system

» **Federico Rossi.** Head of Propulsion Engineering, **Pangea Aerospace**

S-MOVING LAB

Dronak

We empower people and industries to solve common problems of great impact using remotely piloted robots by land, sea and air in a sustainable way

» Fabia Silva. CEO, Dronak

Tech for rent-a-car industry digitalization

» Iván Luarca. CEO, Eccocar

11:00 **Opening Ceremony S-Moving 2019**

12:00 **Promotion of Sustainable Mobility: MOVES Andalucía European Battery Partnership**

Agencia Andaluza de la Energía
CONSEJERÍA DE HACIENDA, INDUSTRIA Y ENERGÍA

» Gema Cantero Medina. Engineer. Energy Performance Promotion Dpt, Agencia Andaluza de la Energía

13:15 **Current situation of the standards for the connected / autonomous vehicle (C-ITS 5G / C-V2X) and future business models associated with its technological development**

One of the main problems for technological development to reach the general public is the need to create regulations that facilitate its implementation in the broadest sense. It is important to know the current situation about the standards in the sector. Likewise, the incorporation of these new technologies give way to new business, technical and service models

» Luis Miguel Chapinal. Technical secretary, COITT (Official Telecommunications and Technical Engineers College)

13:30 **Malaga University: Infrastructure projects for connected, intelligent and sustainable mobility**

Wireless charging for electric vehicles

» Alicia Triviño. Electric engineering Dpt.

V2X Secure Communications on BLE

» Isaac Agudo Computer Languages and Sciences Dpt.

» Manuel Montenegro. Computer Languages and Sciences Dpt.

U-smart-drive: Big-data at the service of mobility on the Teatinos campus

» Luis Felipe Romero Computer Architecture Dpt.

» Guillermo Pérez. Computer Architecture Dpt.

DIAS2P+StreetQR. New solutions for the improvement of mobility in smartcities

» Gonzalo Pascual Ramos. Computer Languages and Sciences Dpt.

S-MOVING LAB

14:30 **Networking Lunch**

16:00 **Engineering and Test Media for ADAS**

» **Laurentino Gutiérrez.** Business Manager e-Mobility & ADAS, **AVL Ibérica**
